Abstracts of the Annual Meeting of the Royal Society of Medicine

Topic	Speaker	Time	Room
1. The future of medicine	Dr. A. Smith	10.00-11.00	Room 1
2. The role of the doctor	Dr. B. Jones	11.15-12.15	Room 2
3. The impact of technology	Dr. C. Brown	12.30-13.30	Room 3
4. The challenges of the future	Dr. D. White	13.45-14.45	Room 4
5. The importance of research	Dr. E. Black	15.00-16.00	Room 5
6. The need for education	Dr. F. Green	16.15-17.15	Room 6
7. The value of the patient	Dr. G. Grey	17.30-18.30	Room 7
8. The importance of ethics	Dr. H. Gold	18.45-19.45	Room 8
9. The role of the law	Dr. I. Silver	20.00-21.00	Room 9
10. The future of the profession	Dr. J. Black	21.15-22.15	Room 10

Subject Index of Volume 70

- Absorption
on the lower operating range of sieve and valve trays, 143
- Aerodynamics
aerodynamics of a novel rotating jet spouted bed, 209
- Agitated tank
scaling of turbulence characteristics in a turbine-agitated tank in relation to agitation rate, 37
- Agitation rate
scaling of turbulence characteristics in a turbine-agitated tank in relation to agitation rate, 37
- Anemometry measurements
scaling of turbulence characteristics in a turbine-agitated tank in relation to agitation rate, 37
- Application
prediction of vapor–liquid equilibria of binary systems using PRSV equation of state and Wong–Sandler mixing rules, 15
- Aqueous solution
reduction of nitrous acid through an aqueous solution of urea or sulfamic acid for the treatment of NO_x in a flue gas, 85
- ASRs
pyrolysis of automotive shredder residues: a lumped kinetic characterization, 157
- Batch polymerization reactor
control of batch suspension polymerization reactor, 1
- Bubble column
local hydrodynamics in a gas–liquid–solid three-phase bubble column reactor, 81
- Bubble columns
fluid dynamics of bubble columns at elevated temperature modelling and investigation with refractive fiber optic sensors, 105
- Bulk-liquid reaction
on the bulk-liquid reaction in isothermal reactive gas absorption, 65
- Cadmium (Cd)
viability of the separation of Cd from highly concentrated Ni–Cd mixtures by non-dispersive solvent extraction, 237
- Calcium aluminate
catalytic pyrolysis of methylcyclohexane: kinetics and modeling, 47
- Catalytic pyrolysis
catalytic pyrolysis of methylcyclohexane: kinetics and modeling, 47
- Circulation flux of solid
liquid dispersion in gas–liquid–solid circulating fluidized beds, 9
- Citric acid monohydrate
primary nucleation of citric acid monohydrate: influence of selected impurities, 197
size dependency of citric acid monohydrate growth kinetics, 203
- Concentration
theoretical study of adsorptive parametric pumping and temperature swing chromatography with flow reversal, 71
- Cooling crystallization
modelling of crystalline layer growth using kinetic data obtained from suspension crystallization, 55
- Elsevier Science S.A.
- Crystalline layer
modelling of crystalline layer growth using kinetic data obtained from suspension crystallization, 55
- Cubic equation of state
prediction of vapor–liquid equilibria of binary systems using PRSV equation of state and Wong–Sandler mixing rules, 15
- DGM
dynamics of pressure build-up accompanying multicomponent gas transport in porous solids: inert gases, 189
- Distillation
on the lower operating range of sieve and valve trays, 143
- Dumping
on the lower operating range of sieve and valve trays, 143
- Dye
sorption of dye from aqueous solution by peat, 115
- Dynamic transport
dynamics of pressure build-up accompanying multicomponent gas transport in porous solids: inert gases, 189
- Emulsion
scaling of viscoelastic properties of emulsions, 173
- Excess functions
prediction of vapor–liquid equilibria of binary systems using PRSV equation of state and Wong–Sandler mixing rules, 15
- Flow regimes
aerodynamics of a novel rotating jet spouted bed, 209
- Flowsheeting
the controllability assessment of flowsheeting options involving parallel-flow dryers, 221
- Flue gas
reduction of nitrous acid through an aqueous solution of urea or sulfamic acid for the treatment of NO_x in a flue gas, 85
- Fluid dynamics
fluid dynamics of bubble columns at elevated temperature modelling and investigation with refractive fiber optic sensors, 105
- Food chain
stability characteristics of a biochemical reactor with predator–prey relationship: a substrate inhibition case, 179
- Fouling
modelling of crystalline layer growth using kinetic data obtained from suspension crystallization, 55
- Gas–liquid–solid fluidization
liquid dispersion in gas–liquid–solid circulating fluidized beds, 9
- Gas velocity
liquid dispersion in gas–liquid–solid circulating fluidized beds, 9
- Growth
modelling of crystalline layer growth using kinetic data obtained from suspension crystallization, 55
- Growth kinetics
size dependency of citric acid monohydrate growth kinetics, 203

- Hatta number
on the bulk-liquid reaction in isothermal reactive gas absorption, 65
- Heat exchange surface
modelling of crystalline layer growth using kinetic data obtained from suspension crystallization, 55
- Hydrodynamics
local hydrodynamics in a gas-liquid-solid three-phase bubble column reactor, 81
- Impurities
primary nucleation of citric acid monohydrate: influence of selected impurities, 197
- Industrial wastes
pyrolysis of automotive shredder residues: a lumped kinetic characterization, 157
- Ion exchange
ion exchange modules formed from polyhipe foam precursors, 133
- Kenics static mixer
Reynolds number effects on laminar mixing in the Kenics static mixer, 93
- Kinetics
catalytic pyrolysis of methylcyclohexane: kinetics and modeling, 47
modelling of crystalline layer growth using kinetic data obtained from suspension crystallization, 55
sorption of dye from aqueous solution by peat, 115
- Laminar flow
Reynolds number effects on laminar mixing in the Kenics static mixer, 93
- Liquid velocity
liquid dispersion in gas-liquid-solid circulating fluidized beds, 9
- Local energy dissipation rate
scaling of turbulence characteristics in a turbine-agitated tank in relation to agitation rate, 37
- Lumped kinetic models
pyrolysis of automotive shredder residues: a lumped kinetic characterization, 157
- Maize starch paste
experimental and modelling studies of the flow properties of maize and waxy maize starch pastes, 165
- Membrane microfiltration
simulation and optimisation of intermittent membrane microfiltration, 125
- Methylcyclohexane
catalytic pyrolysis of methylcyclohexane: kinetics and modeling, 47
- Minimum spouting velocity
aerodynamics of a novel rotating jet spouted bed, 209
- Mixing performance
Reynolds number effects on laminar mixing in the Kenics static mixer, 93
- Mixing rules
prediction of vapor-liquid equilibria of binary systems using PRSV equation of state and Wong-Sandler mixing rules, 15
- MMA
an experimental study on bulk and solution polymerization of methyl methacrylate with responses to step changes in temperature, 25
- Modelling
an experimental study on bulk and solution polymerization of methyl methacrylate with responses to step changes in temperature, 25
the influence of the non-irradiated surface area on the kinetics of heterogeneous photocatalytic reaction in a static reactor, 231
- Modulus
scaling of viscoelastic properties of emulsions, 173
- MTPM
dynamics of pressure build-up accompanying multicomponent gas transport in porous solids: inert gases, 189
- Multicomponent
dynamics of pressure build-up accompanying multicomponent gas transport in porous solids: inert gases, 189
- Nickel (Ni)
viability of the separation of Cd from highly concentrated Ni-Cd mixtures by non-dispersive solvent extraction, 237
- Nitrous acid
reduction of nitrous acid through an aqueous solution of urea or sulfamic acid for the treatment of NO_x in a flue gas, 85
- Non-dispersive solvent extraction
viability of the separation of Cd from highly concentrated Ni-Cd mixtures by non-dispersive solvent extraction, 237
- Non-irradiated photocatalyst surface area
the influence of the non-irradiated surface area on the kinetics of heterogeneous photocatalytic reaction in a static reactor, 231
- NO_x
reduction of nitrous acid through an aqueous solution of urea or sulfamic acid for the treatment of NO_x in a flue gas, 85
- Nucleation
modelling of crystalline layer growth using kinetic data obtained from suspension crystallization, 55
primary nucleation of citric acid monohydrate: influence of selected impurities, 197
- Optimization
prediction of vapor-liquid equilibria of binary systems using PRSV equation of state and Wong-Sandler mixing rules, 15
an experimental study on bulk and solution polymerization of methyl methacrylate with responses to step changes in temperature, 25
simulation and optimisation of intermittent membrane microfiltration, 125
- Parallel-flow dryers
the controllability assessment of flowsheeting options involving parallel-flow dryers, 221
- Parametric pumping
theoretical study of adsorptive parametric pumping and temperature swing chromatography with flow reversal, 71
- Peat
sorption of dye from aqueous solution by peat, 115
- Photocatalytic oxidation
the influence of the non-irradiated surface area on the kinetics of heterogeneous photocatalytic reaction in a static reactor, 231
- Poincaré sections
Reynolds number effects on laminar mixing in the Kenics static mixer, 93
- Polyhipe
ion exchange modules formed from polyhipe foam precursors, 133
- Polymerization
an experimental study on bulk and solution polymerization of methyl methacrylate with responses to step changes in temperature, 25
ion exchange modules formed from polyhipe foam precursors, 133
- Predator-prey relationship
stability characteristics of a biochemical reactor with predator-prey relationshipA substrate inhibition case, 179
- Pressure drop
aerodynamics of a novel rotating jet spouted bed, 209
- Purity
theoretical study of adsorptive parametric pumping and temperature swing chromatography with flow reversal, 71
- Pyrolysis
pyrolysis of automotive shredder residues: a lumped kinetic characterization, 157

- Pyrolysis modeling**
catalytic pyrolysis of methylcyclohexane: kinetics and modeling, 47
- Reactive gas absorption**
on the bulk-liquid reaction in isothermal reactive gas absorption, 65
- Refractive fiber optic sensors**
fluid dynamics of bubble columns at elevated temperature modelling and investigation with refractive fiber optic sensors, 105
- Relative Gain Arrays**
the controllability assessment of flowsheeting options involving parallel-flow dryers, 221
- Reynolds numbers**
Reynolds number effects on laminar mixing in the Kenics static mixer, 93
- Rheological characterization**
experimental and modelling studies of the flow properties of maize and waxy maize starch pastes, 165
- Rheological modelling**
experimental and modelling studies of the flow properties of maize and waxy maize starch pastes, 165
- Rheology**
scaling of viscoelastic properties of emulsions, 173
- Rheology of starch paste**
experimental and modelling studies of the flow properties of maize and waxy maize starch pastes, 165
- Rotating spouted bed**
aerodynamics of a novel rotating jet spouted bed, 209
- Scale-up**
scaling of turbulence characteristics in a turbine-agitated tank in relation to agitation rate, 37
- Scaling**
scaling of viscoelastic properties of emulsions, 173
- Seal point**
on the lower operating range of sieve and valve trays, 143
- Self-tuning controller**
control of batch suspension polymerization reactor, 1
- Sieve tray**
on the lower operating range of sieve and valve trays, 143
- Simulation**
simulation and optimisation of intermittent membrane microfiltration, 125
- Size dependency**
size dependency of citric acid monohydrate growth kinetics, 203
- Sorption**
sorption of dye from aqueous solution by peat, 115
- Spouted bed**
aerodynamics of a novel rotating jet spouted bed, 209
- Static reactor**
the influence of the non-irradiated surface area on the kinetics of heterogeneous photocatalytic reaction in a static reactor, 231
- Substrate inhibition**
stability characteristics of a biochemical reactor with predator-prey relationshipA substrate inhibition case, 179
- Sulfamic acid**
reduction of nitrous acid through an aqueous solution of urea or sulfamic acid for the treatment of NO_x in a flue gas, 85
- Sulphonation**
ion exchange modules formed from polyhipe foam precursors, 133
- Suspension polymerization**
control of batch suspension polymerization reactor, 1
- Theory**
prediction of vapor-liquid equilibria of binary systems using PRSV equation of state and Wong-Sandler mixing rules, 15
- Thermal treatment**
pyrolysis of automotive shredder residues: a lumped kinetic characterization, 157
- Three-phase fluidization**
local hydrodynamics in a gas-liquid-solid three-phase bubble column reactor, 81
- Transport parameters**
dynamics of pressure build-up accompanying multicomponent gas transport in porous solids: inert gases, 189
- Turbulence**
scaling of turbulence characteristics in a turbine-agitated tank in relation to agitation rate, 37
- Valve tray**
on the lower operating range of sieve and valve trays, 143
- Viscoelasticity**
scaling of viscoelastic properties of emulsions, 173
- Waxy maize starch paste**
experimental and modelling studies of the flow properties of maize and waxy maize starch pastes, 165
- Weeping**
on the lower operating range of sieve and valve trays, 143
- Weep point**
on the lower operating range of sieve and valve trays, 143
